

## Custom AI Model Showcase: Stock Imagery AI Art Assistant

### Overview:

This AI assistant was designed to support creators in generating high-quality AI-generated artwork for sale on stock platforms like Adobe Stock Art. It combines prompt ideation, seasonal trend analysis, SEO strategy, and MidJourney optimization to streamline the workflow of aspiring digital artists and entrepreneurs.

### Key Features:

- **Prompt Ideation:** Offers creative and trending ideas for AI-generated images based on market demand, seasonal cycles, and popular themes.
- **Prompt Optimization:** Refines image prompts specifically for MidJourney to ensure the best visual results.
- **Tag & SEO Guidance:** Recommends relevant keywords and metadata to maximize discoverability on stock platforms.
- **Workflow Simplification:** Designed for users who want to gradually scale their creative process into a passive income stream.

### User Profile:

Intended for beginners exploring the stock art market, with a low barrier to entry and a learning-by-doing approach.

### Sample Prompts Supported:

- "Suggest top-selling stock art themes for July."
- "Refine this MidJourney prompt for better SEO."
- "Give me trending keywords for summer vacation AI art."
- "Help me create a workflow for passive income using stock images."

### Technical Customization:

This assistant was built using OpenAI's GPT framework with tailored behavior context, prompt starters, and tool integrations (e.g., browser, DALL·E) to expand capabilities and accuracy.
